

AGERA® Rx anti-ageing skin care has been scientifically proven to penetrate and stimulate the skin for rapid, visible results. Powerful antioxidants protect against free radical damage, while retinols of varying strengths smooth away fine lines and wrinkles. Growth Factor Peptides, available exclusively in AGERA® Rx, help to control the skin's internal ageing process while restoring and maintaining its thickness and resilience. AGERA® Rx skin care is formulated using tiny particles called bioemulsions that encapsulate these powerful anti-ageing ingredients and ensure their penetration into the deepest layers of the skin.

THE BEAUTY OF SCIENCE™

ESSENTIAL AGE MANAGEMENT PRODUCTS

Ultra Mild Cleanser	all skin types
Microderma Rx System	exfoliating vitamin C treatment
MagC® Peptide Serum	vitamin C/collagen peptide
Microemulsion Antioxidant Serum	antioxidant vitamins A and E
IGF Dermal Matrix MicroGel	potent growth peptide
Ultra Moisture Complex	antioxidant moisturiser
Ultimate Retinol Rejuvenator	retinols/growth peptides
Daily Moisturising Protector SPF 25	moisturiser/SPF 25 UVA/UVB protection
Ultra Performing Sunscreen SPF 25+	chemical free/hypoallergenic/SPF 25+ UVA/UVB protection/water resistant

THE BEAUTY OF SCIENCE™

ANTI AGEING

developed in the US is scientifically proven and researched. Experience the beauty of science with the most effective skin care range in the world.

MAKING A MAJOR DIFFERENCE

Antioxidants

Free radicals are damaging agents that disrupt the normal function of skin cells. They are caused by sun exposure, pollution and other environmental factors. AGERA® Rx contains a range of powerful antioxidants proven to combat free radical damage and restore a smoother, softer texture to the skin.

Retinol

Retinol has been clinically proven to reverse many signs of skin ageing such as fine lines, wrinkles and uneven skin tone. AGERA® Rx delivers this powerful anti-ageing ingredient in bioemulsions that penetrate the skin as time-released capsules to ensure rapid results with minimal irritation.

Bioemulsion Technology and Skin Care

AGERA® Rx is the first skin care range in the world to use tiny bioemulsion particles to encapsulate its powerful anti-ageing ingredients and deliver them deep within the skin (see diagrams). These minute particles penetrate the skin's outer layer to ensure minimum irritation and maximum results.

AGERA® Rx Skin Peels

The revolutionary proliferative peels created by AGERA® Rx are non-irritating, pain free and cause no down time from skin shedding, redness or irritation. These unique treatments cause significant stimulation of the fibroblasts deep within the skin to produce new collagen and elastin. This proliferative effect on the skin's cells delivers many anti-ageing benefits without any unsightly skin shedding or redness. After only one session, the skin will look clearer, smoother and brighter. For maximum results a course of AGERA® Rx skin peels can be combined with medical microdermabrasion.

SKIN GETS A WAKEUP CALL

Growth Factor Peptides

Growth factor levels decline as we age, causing the skin to thin and lose its elasticity. The powerful Growth Factor Peptides found in AGERA® Rx anti-ageing products stimulate the cells to produce new collagen and elastin for firmer, thicker, younger looking skin.
